## Lessons learned

- Transparency of performance triggers action on school ground and within the system
- Transparency of WinS management on School, Division and Regional level is a systems approach and goes far beyond individual school level
- Publishing data and recognition of achievements work!
- Dashboards support data driven decision making and allocation of resources
- User orientation is an ongoing process
- Policies are dynamic and dashboards should follow
- Dashboards for standard situation, additional analysis capacity remains needed, but:
- **Keep it simple!! (additional features can be added later!)**
